

Our fabrication/production division uses state-of-the-art equipment allowing, allowing us to produce the highest quality finished products. Our fabrication machine inventory consists of:

- 10, 16, and 20 ft break press
- 10 ft shear
- 24 ft V-grooving machine
- 8 ft column roller
- Lathe
- Milling machine
- Pipe/tube bending machine
- Tig, mig, and stick welding machines capable of welding steel, stainless steel, bronze, and aluminum
- Laser cutting
- Water jetting

## Services

- Cladding
- Fabrication
- Hand Railing Systems
- Cable Rail Systems
- Installation
- Elevator Interiors
- Engineering

Cable Railing Job

**Ted Turner Company, Inc. has over 30 years of experience fabricating, erecting, and installing custom handrails as well as cladding structures, using stainless steel, aluminum, bronze, brass, and powder-coated steel. The use of laser and water jetting technology enables us to create products that were, just a short time ago, unachievable.**

**The extensive experience of our engineering department enables us to transform the most complex, innovative ideas into readily understood, comprehensive designs.**

**Our experienced staff and production capabilities allow us to design, produce, and install the highest quality, most diverse, and most unique architectural metal products for our customers.**
